CLINICAL CASE HANDBOOK

Before & After Case Handbook

Clinical treatment case documentation

Hair Restoration | Hair Fall Management | Skin Treatments

FIRST EDITION · VERSION 1.0 DRAFT

For doctors, therapists & clinical photography staff

RENEW GROUP OF COMPANIES

About this handbook

A standard way to record every Before & After case — the same views, the same conditions and the same details — so results are documented honestly and consistently.

How to use a case page

1. **Assign a case ID**
   Use the pre-printed ID (e.g. RP-HT-001) and note the consent reference.
2. **Capture BEFORE photos**
   Take every standard view and tick the capture-conditions checklist.
3. **Record treatment details**
   Concern, assessment, treatment performed, sessions or grafts and dates.
4. **Capture AFTER photos**
   Same camera, distance, angle, lighting and position as the BEFORE set.
5. **Approve for inclusion**
   Treating doctor reviews; case approved and dated in the case record.

Contents

Section	Covers	Page
01 · Hair Treatments	FUE, DHI, Sapphire, GFC, PRP, Mesotherapy, QR678, Hair fall management	3
02 · Skin & Aesthetic Treatments	Acne, scars, pigmentation, lasers, peels, facials, rejuvenation, lips, hair removal, keloid, IV glutathione	20
03 · Clinical Photography Standard	Required and not-permitted practices, standard views	35
04 · Documentation & Consent	Consent checklist and case record	36
Contact	Clinic contact details	37

SECTION 01

Hair Restoration

FUE · DHI · Sapphire · GFC · PRP · Mesotherapy · QR678 · Hair Fall Management

Hair case index

Case ID	Treatment	Recorded as	Pages
RP-HT-001	FUE Hair Transplant	Number of grafts	4–5
RP-HT-002	DHI Hair Transplant	Number of grafts	6–7
RP-HT-003	Sapphire Hair Transplant	Number of grafts	8–9
RP-GFC-001	GFC Hair Treatment	Sessions	10–11
RP-PRP-001	PRP Hair Treatment	Sessions	12–13
RP-MES-001	Mesotherapy	Sessions	14–15
RP-QR-001	QR678	Sessions	16–17
RP-HFM-001	Hair Fall / Hair Thinning Management	Sessions	18–19

Standard hair views

Front, top, crown, left side, right side, plus an optional close-up. Same hair position and parting; dry hair.

Each hair case has **two pages**: page 1 for BEFORE photos and treatment details, page 2 for AFTER photos and clinical observations.

FUE Hair Transplant

CASE ID	TREATMENT
RP-HT-001	FUE Hair Transplant

Clinical photography standard

Rules for consistent, credible documentation.

Required

- Same patient, same camera
- Same distance and angle
- Same lighting and background
- Same expression and hair position
- Natural skin texture preserved
- Anonymous case ID only

Not permitted

- Beauty filters
- Artificial smoothing
- Manipulated hair density
- Misleading cropping
- Dramatic lighting differences
- Promotional graphics over photographs
- Patient names or identifying marks

Standard views

Category	Views	Notes
Hair	Front, top, crown, left side, right side	Same hair position and parting; dry hair
Face	Front, left profile, right profile	Neutral expression; no makeup
Lips	Straight-on close-up	Same lighting, distance and lip position
Body / scar	Overview, close-up, side	Include scale reference where useful

Retention and storage

- Store images on clinic systems only
- Keep original, unedited files
- Record the capture date and camera settings in the case record

Patient consent

No case is included without written consent and anonymisation.

Consent checklist

- [ ] Written consent for treatment on file
- [ ] Separate written consent for clinical photography
- [ ] Purpose stated: record, education, or publication
- [ ] Patient told they may withdraw consent
- [ ] Case anonymised before inclusion in this handbook
- [ ] Consent reference noted against the case ID

Case record

CASE ID	TREATING DOCTOR
CONSENT REFERENCE	TREATMENT DATE(S)
SESSIONS / GRAFTS	FOLLOW-UP INTERVAL
PHOTOGRAPHS CAPTURED BY	APPROVED FOR INCLUSION BY
APPROVAL DATE	REMARKS

Clinical photographs are presented for documentation and educational purposes. Individual results may vary. Treatment recommendations are based on individual assessment.
