STANDARD OPERATING PROCEDURES

Clinic SOP Handbook

Standard Operating Procedures for all branches

Foundations | Clinical Care | Governance

RP-SOP-001 · VERSION 1.0 · DRAFT FOR APPROVAL

Internal controlled document · All branches, all staff

RENEW GROUP OF COMPANIES

Document control

This handbook is a controlled document. Only the latest approved version may be used at a branch.

Field	Detail
Document title	Renew Plus Clinic SOP Handbook
Document no. / version	RP-SOP-001 / v1.0 (Draft)
Owner	Clinic Director / Medical Director
Prepared by	Operations and Quality lead
Effective date	To be entered on approval
Review cycle	Every 12 months, or after any incident or regulation change
Applies to	All branches, all clinical and non-clinical staff
Distribution	Controlled copy at each branch; digital master with Operations

Contents

Part A · Foundations

- Purpose, scope, roles
- Patient journey
- Reception and appointments

Part B · Clinical care

- Consultation and consent
- Hair and skin procedures
- Infection control
- Emergency handling

Part C · Governance

- Records and photography
- Complaints
- Opening & closing checklists
- Audits, document control, approvals

Purpose, scope and principles

One standard way of working, so every patient gets the same safe, respectful experience at every Renew+ branch.

Purpose

- Give every patient the same safe, respectful experience at every branch
- Make each task repeatable and auditable

Scope

- All staff: doctors, therapists, nurses, reception, housekeeping
- All services: hair, skin, consultations, aftercare

Principles

- Patient safety first
- Informed consent always
- Privacy and dignity
- Honest outcomes, no guarantees
- Document what you do

⚠ Clinical protocols in this handbook are **templates** and must be confirmed by the Medical Director before use.

Roles and responsibilities

Role	Key responsibilities
Medical Director	Approves clinical protocols, handles escalations, signs off audits
Branch Manager	Daily operations, staffing, checklists, complaint first response
Doctor / Dermatologist	Assessment, diagnosis, treatment plan, consent, procedures
Therapist / Nurse	Assist procedures, infection control, patient monitoring, aftercare
Reception	Greeting, appointments, registration, billing, patient queries
Quality Lead	Audits, document control, incident tracking

Patient journey map

Eight steps from first enquiry to review. Every handover between steps is recorded in the patient file.

1	**Enquiry** Call, WhatsApp, website or walk-in	Reception
2	**Booking** Slot confirmed, reminder sent	Reception
3	**Arrival** Greeting, registration, consent to data use	Reception
4	**Consultation** History, examination, plan, cost	Doctor
5	**Consent** Explain risks, sign before any procedure	Doctor
6	**Treatment** Procedure per SOP, monitoring	Doctor + Therapist
7	**Aftercare** Written instructions, follow-up booked	Therapist + Reception
8	**Review** Progress photos, feedback, next steps	Doctor

Golden rule: every handover between steps is recorded in the patient file.

Patient touchpoint standards

What every patient should experience before, during and after the visit.

Before the visit

- Reply to enquiries promptly during working hours
- Confirm appointment and what to bring
- Share branch address and directions

During the visit

- Greet within one minute of arrival
- Keep waiting time communicated
- Respect privacy in all rooms

After the visit

- Aftercare sent in writing
- Check-in message after procedures
- Follow-up booked before leaving

Reception: greeting and front desk

Greeting

- Stand, smile, greet by name when known
- Offer water and seating
- Never discuss a patient in public areas

Front desk upkeep

- Clean desk, brochures stocked
- Tablet or register ready
- Branch phone answered within a few rings

Dress and conduct

- Clinic uniform and ID badge
- Phones on silent while on duty
- Calm tone, even when busy

1 minute
Greet every arrival

A few rings
Answer the branch phone

Privacy
No patient talk in public

Calm tone
Even when busy

Appointments, calls and WhatsApp

Every enquiry is logged. Every appointment is confirmed and reminded.

Channel	Standard
Main phone / WhatsApp	Primary line: +91 90800 86365. Log every enquiry in the enquiry register
Alternate line	Backup line: +91 91506 06660. Use when main line is busy or out of service
Website	Booking and enquiries via renewhairandskincare.com. Check submissions at least twice per working day
Confirmation	Send date, time, branch, doctor name and preparation notes
Reminders	Send one day before; reconfirm morning of visit
Cancellations	Offer a new slot; record the reason

Registration, payment and walk-ins

Registration

- Create patient ID; verify name and phone
- Collect medical history form
- Record consent for data use and contact

Billing

- Quote must match the treatment plan
- Itemised receipt for every payment
- Refund and credit notes need manager approval

Walk-ins

- Check doctor availability
- Offer the next free slot honestly
- Prioritise urgent post-procedure concerns

Consultation flow

Five steps, done the same way by every doctor at every branch.

1. **Prepare**
   Room clean, file and history form ready
2. **History**
   Concern, duration, medication, allergies, prior treatments
3. **Examine**
   Scalp, hair, skin; trichoscopy or devices as needed
4. **Plan**
   Diagnosis, options, expected course, cost
5. **Document**
   Findings, advice and plan recorded same day

⚠ **Never promise guaranteed results.** Explain realistic outcomes and timelines.

Hair assessment

History

- Onset, pattern and rate of hair fall
- Family history, diet, stress, hair care
- Medication and previous treatment

Examination

- Scalp condition and density
- Hair pull test where appropriate
- Baseline photos with consent

Investigations

- Blood tests when clinically indicated
- Referral if systemic cause suspected
- Record advice given

Skin assessment

Match the treatment to the skin type, the concern and the patient's goals.

History

- Concern, triggers, skincare routine
- Allergies and sensitivities
- Pregnancy or breastfeeding status where relevant

Examination

- Skin type and condition in good light
- Patch test where indicated
- Baseline photos with consent

Planning

- Match treatment to skin type and goals
- Discuss downtime and sun protection
- Record advice given

Informed consent process

Before signing

- Doctor explains procedure, benefits, risks, alternatives
- Patient may ask questions and take time
- Language the patient understands

Signing

- Patient or authorised person signs and dates
- Witness signs
- Separate consent for photography

Rules

- No procedure without a signed consent
- Re-consent if the plan changes
- Patient may withdraw at any time

Consent form checklist

Check every consent form before the procedure starts.

Item	Check
Patient name, ID, date	Complete and legible
Procedure name and area	Specific, not generic
Risks and side effects explained	Listed on form
Alternatives discussed	Recorded
Pre- and post-care understood	Initialled
Photography and data consent	Separate tick and signature
Doctor and witness signatures	Both present

Hair procedures: general SOP

Before

- Valid consent on file
- Confirm identity, area and procedure
- Check allergies and medication
- Baseline photo taken

During

- Hand hygiene, gloves, sterile setup
- Doctor-led; steps follow device or drug instructions
- Monitor comfort and vitals as needed

After

- Written aftercare given
- Waste and sharps disposed of correctly
- Entry in procedure register and file

⚠ Branches confirm the hair services they offer and adapt the procedure pages with the Medical Director.

PRP and injectable therapies

Single-use sterile kits, labelled samples and an approved protocol — every time.

Preparation

- Verify consent and contraindications
- Use single-use, sterile kits only
- Label sample with patient ID

Procedure

- Clean scalp, anaesthesia as per doctor
- Process and administer per approved protocol
- Observe patient before discharge

Record

- Batch and kit numbers
- Sessions completed and planned
- Review date

Hair restoration (if offered)

1. **Day before**
   Pre-op instructions and fitness check · written consent and photographs · confirm payment and schedule
2. **Procedure day**
   Sterile theatre prepared and checked · team roles assigned · grafts handled and labelled per protocol
3. **Post-op**
   Written care plan and contact number · review within days as advised · follow-up photos at set intervals

Skin procedures: general SOP

Doctor or trained therapist only. Never leave the patient unattended.

Before

- Consent and patch test where needed
- Remove makeup, cleanse skin
- Protect eyes, set device parameters per protocol

During

- Doctor or trained therapist only
- Never leave patient unattended
- Stop if unexpected reaction

After

- Soothe and protect skin
- Sun protection advice
- Record settings, products and reactions

Peels, lasers and devices

Chemical peels

- Select agent per skin type and protocol
- Time and neutralise as specified
- Document strength and duration

Lasers & energy devices

- Trained, authorised operators only
- Eye protection for all in room
- Daily device checks and log

Maintenance

- Service per manufacturer schedule
- Report faults to manager immediately
- Tag faulty equipment out of use

Aftercare standards

Every patient leaves with written aftercare and a way to reach us.

Give to every patient

- Written instructions for the procedure
- What is normal and what is not
- Contact numbers: +91 90800 86365

Follow-up

- Check-in message after the procedure
- Review visit booked
- Escalate concerns to the doctor same day

Record

- Aftercare sheet given and noted
- Complications logged
- Patient feedback captured

Use the **Hair Treatment Aftercare** and **Skin Treatment Aftercare** patient guides as the standard written instructions.

Infection control: hand hygiene and PPE

Hand hygiene

- Before and after every patient
- After glove removal
- Before procedures and after contamination

PPE

- Gloves, mask, apron as required
- Change between patients
- Remove and dispose safely

Surfaces

- Disinfect couch and trolley between patients
- Approved disinfectant at correct contact time
- Log cleaning times

Sterilisation, sharps and waste

Clean, safe and traceable — from the instrument tray to the waste collector.

Instruments

- Clean, pack, sterilise, store
- Check indicator results
- Never reuse single-use items

Sharps

- Puncture-proof container at point of use
- Never recap needles
- Replace when three-quarters full

Biomedical waste

- Segregate in colour-coded bins per local rules
- Licensed collector only
- Keep disposal records

⚠ **Needle-stick injury:** wash, report to the manager at once, document, and seek medical review.

Emergency handling

Recognise

- Fainting or dizziness
- Allergic reaction or swelling
- Breathing difficulty, chest pain
- Severe bleeding

Act

- Stop the procedure and call for help
- Lay patient flat, check airway and breathing
- Doctor in charge takes control
- Use emergency kit per protocol

Escalate

- Call ambulance for serious cases
- Inform family contact
- Record time, actions, outcome
- Report to Medical Director

Emergency readiness

Be ready before an emergency happens.

Item	Standard
Emergency kit	Checked weekly; drugs and expiry dates logged
Contact list	Ambulance, nearest hospital, doctors on call displayed at each desk
Staff training	Basic life support refreshed regularly; record of attendance
Drills	At least once a year per branch
Incident report	Completed within 24 hours and sent to Medical Director

Patient records and data privacy

Records

- One file per patient, unique ID
- Entries dated, signed, legible
- Corrections by strike-through, never erasing

Privacy

- Share only with those who need to know
- Store files locked; digital access by login only
- No patient data on personal phones

Retention

- Keep records for the period required by law and clinic policy
- Dispose securely
- Follow applicable Indian data protection law

Clinical photography

Consistent, consented and stored securely. See the Before & After Case Handbook for full standards.

Consent

- Separate written consent
- State whether for records, marketing or both
- Patient may withdraw

Standards

- Same angle, light, distance at each visit
- Plain background, no filters
- Remove jewellery and obstructions if relevant

Storage

- Clinic device or secure system only
- Delete from personal phones
- Face-identifying images need explicit marketing consent

Complaints handling

1. **Listen**
   Receive calmly, apologise for the experience
2. **Record**
   Log in complaints register
3. **Acknowledge**
   Confirm receipt promptly
4. **Investigate**
   Manager reviews; doctor if clinical
5. **Resolve**
   Explain outcome, remedy offered
6. **Learn**
   Review trends monthly; unresolved or serious complaints go to the Medical Director

Opening checklist

Completed every morning before the first patient. Date: _____ Branch: _____

Task	Done	Initials
Unlock, lights, air-conditioning on	☐	
Reception, waiting area, restrooms clean	☐	
Treatment rooms set up and disinfected	☐	
Equipment powered on and checked	☐	
Emergency kit present and sealed	☐	
Stock and consumables for the day	☐	
Phones and WhatsApp line live; day schedule reviewed	☐	

Closing checklist

Completed every evening after the last patient.

Task	Done	Initials
Last patient follow-ups noted	☐	
Instruments cleaned and sterilised	☐	
Waste and sharps handled	☐	
Records filed and locked	☐	
Billing reconciled and cash secured	☐	
Equipment off; lights, AC and doors secured	☐	
Next-day schedule shared with staff	☐	

Branch audit

Score each area 0–5. Month: _____ Auditor: _____

Area	What is checked	Score (0–5)
Reception	Greeting, registers, wait times	
Consent and records	Signed forms, complete files	
Infection control	Hand hygiene, sterilisation logs	
Equipment	Service logs, faults	
Emergency readiness	Kit, contacts, training	
Cleanliness	Rooms, restrooms, waste	
Total		/ 30

Audit cycle and follow-up

Frequency

- Internal branch audit every month
- Quality Lead audit every quarter

Findings

- Scored and shared with branch within days
- Corrective action owner and due date assigned

Close-out

- Re-check of critical items
- Summary to Medical Director
- Trends reviewed in management meeting

Document control

Only the latest approved version is used. Every change is reviewed, approved and briefed.

Versioning

- Document number plus version on every page
- Only latest approved version in use
- Superseded copies withdrawn

Change process

- Change request raised
- Reviewed by owner and Medical Director
- Approved, logged, staff briefed

Access

- Digital master with Operations
- Controlled printouts at each branch
- Training record for each revision
