PATIENT CARE GUIDE

Skin Treatment Aftercare

Do's & Don'ts after skin treatments

Facials | Peels | Laser | Skin Rejuvenation

VERSION 1.0 · PATIENT EDITION

For patients after facials, peels, laser & rejuvenation

RENEW GROUP OF COMPANIES

Do's after your skin treatment

Follow the aftercare plan provided for your specific skin treatment. Gentle care protects the skin barrier and supports recovery.

Be gentle
Lukewarm water, no scrubbing

Protect
Sunscreen as directed

Hydrate
Moisturise, eat well

Follow up
Keep your review visits

Please do

- Follow your doctor's or therapist's instructions exactly as advised.
- Use cool or lukewarm water if the skin feels sensitive; avoid scrubbing.
- Use only the cleanser, moisturiser and products recommended for your skin.
- Keep skin hydrated and maintain a balanced diet.
- Apply broad-spectrum sunscreen as directed; limit direct sun exposure.
- Attend scheduled follow-up appointments.
- Keep the treated area clean and handle skin gently.
- Contact the clinic if you notice an unexpected reaction or worsening symptoms.

After peels, lasers or other procedures: use sunscreen and restart active ingredients only when your clinician advises.

Don'ts after your skin treatment

Avoid common triggers that may irritate recently treated skin.

- Do not pick, scratch, peel or squeeze the treated skin.
- Avoid makeup on the treated area for as long as your clinician recommends.
- Do not use exfoliants, scrubs, retinoids, acids or strong actives until cleared.
- Do not wax, shave or use hair-removal products on the area until cleared.
- Avoid direct sun, tanning and excess heat when advised.
- Do not stop or start prescribed medicines without medical advice.
- Do not apply unapproved home remedies, fragranced products or harsh cosmetics.
- Do not expect immediate final results; redness, peeling or results vary by treatment.

What is usually normal

Mild redness

- Common after many treatments
- Should settle as advised

Light peeling or dryness

- Expected after peels
- Moisturise; never pull skin

Gradual results

- Skin renews over weeks
- Sessions build on each other

⚠ If anything feels **worse instead of better**, contact the clinic — do not wait for your next visit.

Your treatment may need extra care

Aftercare differs for facials, chemical peels, laser procedures and injectables. Follow the sheet given for your treatment.

Facials & HydraFacials

- Keep the routine gentle
- Avoid exfoliating products if the skin is sensitive
- Follow the clinic's guidance on makeup and actives

Chemical Peels

- Do not pull or peel flaking skin
- Avoid acids, retinoids and exfoliation
- Restart actives only when your clinician says it is safe

Laser & Skin Rejuvenation

- Protect the area from sun exposure
- Follow instructions for cleansing, cooling and moisturising
- Use sunscreen as directed

Injectables / Other Procedures

- Follow the specific instructions from your treating clinician
- Respect activity restrictions
- Attend the planned follow-up

Daily skin routine after treatment

1. **Cleanse gently**
   Recommended cleanser with cool or lukewarm water; pat dry — no rubbing.

2. **Moisturise**
   Use the moisturiser recommended for your skin to support the barrier.

3. **Protect**
   Broad-spectrum sunscreen as directed; reapply and limit direct sun.

When to contact the clinic

Contact the clinic promptly if symptoms are significant, unexpected or getting worse.

- ⚠ Severe or worsening pain, burning or irritation
- ⚠ Marked swelling, persistent bleeding or blistering
- ⚠ Spreading redness, increasing warmth, pus or other signs of infection
- ⚠ Any unexpected reaction that concerns you

⚠ **Urgent:** seek urgent medical care for severe symptoms, difficulty breathing or rapidly worsening swelling.

⚠ **Important:** this is general guidance only. Your treating clinician's instructions take priority and may differ by procedure, skin type and individual needs.
